Dimensions:  
1.75" X 4" X 7/8"

## Includes:

Wiring Harness  
Internal Combo GPS/GSM Antenna

### System Benefits

- **Reduced Fuel Expenses**
- **Decreased Overtime**
- **Increased Driver Productivity**
- **Decreased Driver Speeding**
- **Lower Insurance Costs 15%**
- **Improved Customer Service**
- **More Efficient Response Times**
- **Benefits of a Virtual Time-clock**
- **Validation of Service Calls**
- **More accurate Billing**

- **Automatic Tracking** – GPS Tracking Device can be programmed to automatically send a location update in 10, 5, 3, 2, 1 Minute Intervals.
- **Manual Locate** - Allows you to request the current location of the GPS Device at any time.
- **Ignition On/Off Reporting** – Automatically marks the date, time, and location a vehicle engine is turned On or Off.
- **Idle Time Reporting** – Automatically marks the date, time, and location of a vehicle left idling and not moving. *(Select Plans Only)*
- **Geo-Fence Alert** – Up to 15 custom GeoFences can be programmed to alert and report automatically with the date, time, and location of a vehicle that travels in, out or both of a pre-defined area geographic area.
- **Geo-Fence Arrival Alert** - Automatically sends notification if the vehicle does not arrive at a specific location by a pre-programmed time.
- **Self GeoFence Perimeter Protection** – The Lokator II can be programmed to activate a perimeter GeoGuard virtual fence on a parked vehicle. Should the vehicle be towed, an alert notification will be sent.
- **Speeding Alert** – Automatically marks the date, time, and location if the vehicle travels over the pre-set Speed Limit.
- **Power Interrupt Alarm** - Automatically sends notification if the main power is cut or disconnected. *(Requires Optional Battery backup)*
- **Antitheft Alarm** - Automatically sends notification if the vehicle is moving with the Ignition Off.
- **Remote Sensor Reporting** - Automatically marks the date, time, and location of Optional sensors such as doors, PTO's, Concrete pumps, temperature, or vehicle functions.
- **Store and Forward** – When the GPS Device cannot lock onto a cellular signal, it will store update information and forward the data when it reconnects. The device can store 128 messages in internal memory.
- **SMS & E-mail Notification** – System can be set-up to automatically send Alarm and Alert notifications by SMS Text Message, e-mail, or both
- **Supports Remote control options** – a total of 4 optional functions such as engine disable / enable, door unlock, Buzzer alert and SOS button can be installed.
